

HybTech

Development of an Environment-Friendly F1 Breeding Technology

Aim of this project

Using molecular approaches to establish a breeding technology that can combine doubled haploid technology and reversible male sterility for F1 seed production

Partners

- Chun-Ming Liu, Plant Research International BV, Wageningen, Netherlands
- Andreas Mordhorst, Nunhems Zaden BV, Haelen, Netherlands
- Erwin Heberle-Bors, University of Vienna, Austria
- Lothar Willmitzer, Max-Plank Institute of Molecular Plant Physiology, Golm, Germany
- Cris Kuhlemeier, University of Bern, Switzerland
- Elisabetta Lupotto, Istituto Sperimentale per la Cerealicoltura, Bergamo, Italy

Project QLK5-CT-2000-00902 runs from 2001 till 2004

Co-ordinator: C. M. Liu, Plant Research International, 6708 PB, Wageningen, NL
